

Bardon and Croft Quarries

PROJECT:	Bardon and Croft Quarries
CLIENT:	Aggregate Industries Limited
VALUE:	
AT-A-GLANCE:	Full Load and Haul Services Granite Quarries 7 years Contract 4 million tonnes per annum

PROJECT OUTLINE

Both quarries play a significant role in providing high PSV stone not just into the local markets but also into the North and South-East Regions by rail.

PROJECT DELIVERY

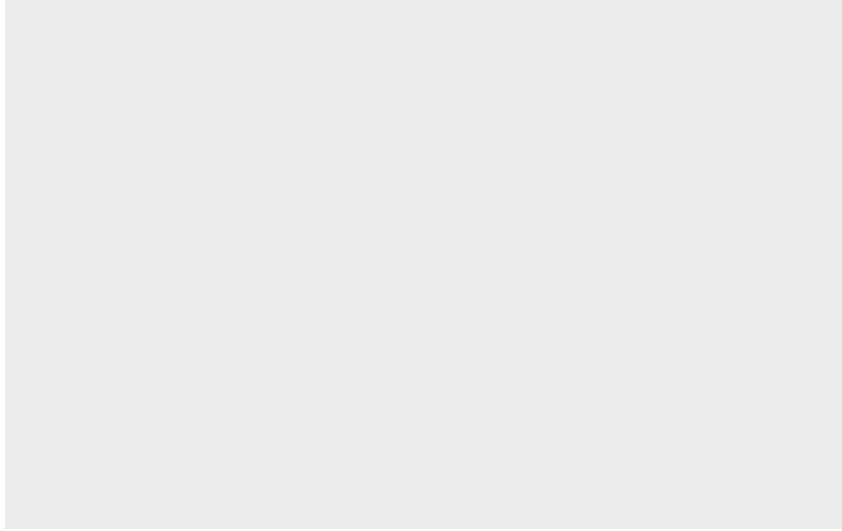

The contract saw a significant investment by Walters Plant Hire with our partners at Caterpillar and Komatsu, with core equipment being CAT 992 Loading Shovels, CAT 390 excavator, Komatsu PC1250 Excavator, CAT 775 / 777 Rigid Dump trucks and various smaller auxiliary equipment

The equipment is fully utilised to deliver more than 4 million tonnes per annum of granite to the Client's primary crushers on a continuous choke feed basis. Our site management teams are fully integrated with our Client's Teams at both sites.

The contract involved the smooth transfer of employees from the existing contractor under TUPE and the recruitment of new employees from the local area.

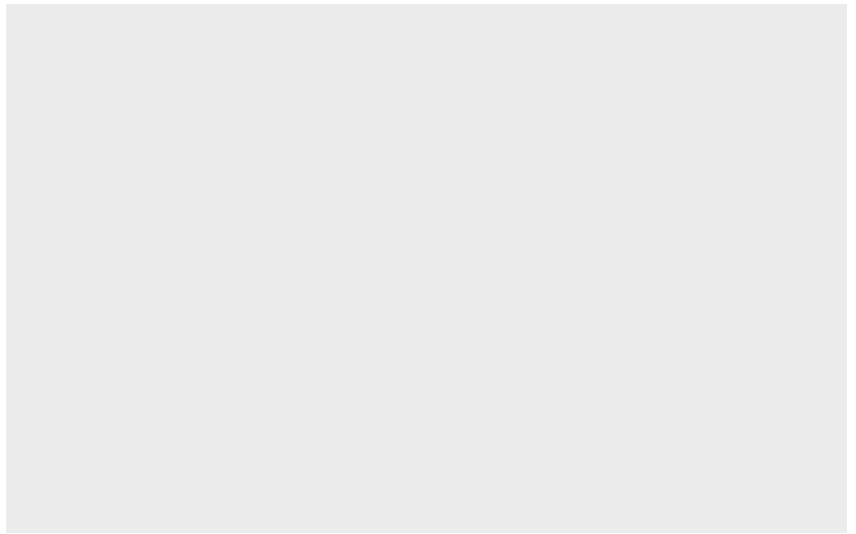

The extension of the original 5 year contract for a further two years has confirmed both Aggregate Industries' and Walters' commitment to a partnership that has been developed since day one.
